

## Space Rock lyrics

### [Chorus 1]

Count me down like 1, 2, 3  
I'm about to take off, Apollo 13  
And I might be gone for 4 more springs  
Cuz I don't need oxygen to breathe  
Come back down in 2023  
Like a astronaut, do y'all remember me?  
Been so far across galaxies  
But I got the Space Rock if that's what you need

### [Verse 1]

Oh geez, they need it  
They pleading like "oh please!"  
I found it on Venus  
They fiend for these melodies  
Now I'm blowing smoke rings around Andromeda  
I ain't never been so far from Jupiter  
Pray my sins, I know they keep adding up  
Let me be cleansed, take me back to the 3rd rock

### [Chorus 2]

Like 1, 2, 3  
Ima touch down, Apollo 13  
And I know I been gone for like what seems  
Probably way too long to you human beings  
Drift back out in 3033  
When I outlive all of y'all earthlings  
And I might get lost in Neptune's rings  
Cuz I got my Space Rock and that's all I need

### [Verse 2]

And I, Might not be leaving for good  
But I'm sick of earth, beam me up  
I give you all of this love  
And watch how they does me  
Like ET, quarantine me  
Let whole teams of scientists come see me  
Just to dissect me, I won't let you  
So all bets are off, homie I'm getting out of here

### [Chorus 1]

### [Verse 3]

They need it from me  
I need y'all to see, that I need some relief  
The conditions they keep have been torturing me  
I'm pleading on my knees, let me leave promptly, oh please...  
Like 1, 2, 3!  
Cuz I'm late for a meeting  
And that shit is on a meteor  
So you can't hold me

[Bridge]  
Count me down like 1, 2, 3  
Before I crash down, Apollo 13  
Boi I been round the whole galaxy  
Now I'm trying to settle down and take it easy  
Head back out in 4043  
I'm a astronaut, the job always needs me  
Been so long since I seen people  
But is that so wrong when they always leave me?

[Chorus 3]  
Like 1, 2, 3  
Ima take off, Apollo 13  
And I might be gone for 4 more springs  
Cuz I don't need oxygen to breathe  
Come back down whenever I please  
Like a astronaut, do y'all remember me?  
Been so far across galaxies  
But I got the Space Rock cuz that's what you need

[Guitar Solo]
